

## Technical data:

working width	1'200 – 2'400 mm
operating speed	up to 80 m/min
coating methods	rotogravure and multi-roll
coating weights	3 – 80 gsm (full surface or dot coating)
adhesives	thermoplastic hotmelt reactive PU hotmelt

## Description:

CAVI-2-COAT is a multifunctional machine for coating and laminating. The coating modus can be changed between rotogravure modus and a variety of full-surface coating by just press a button. For specific coatings it's necessary to change the engraved roll with a smooth roll. This machine includes innovative technologies for highest coating precision with enormous flexibility and short downtime.

Reliability and reproducibility is a matter of course.

# CAVI-2-COAT

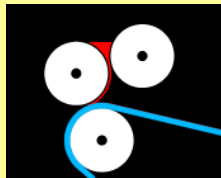

**Coating and Laminating  
for multiple purpose**

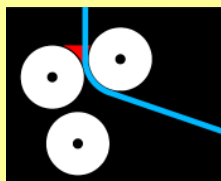

**Rotogravure**

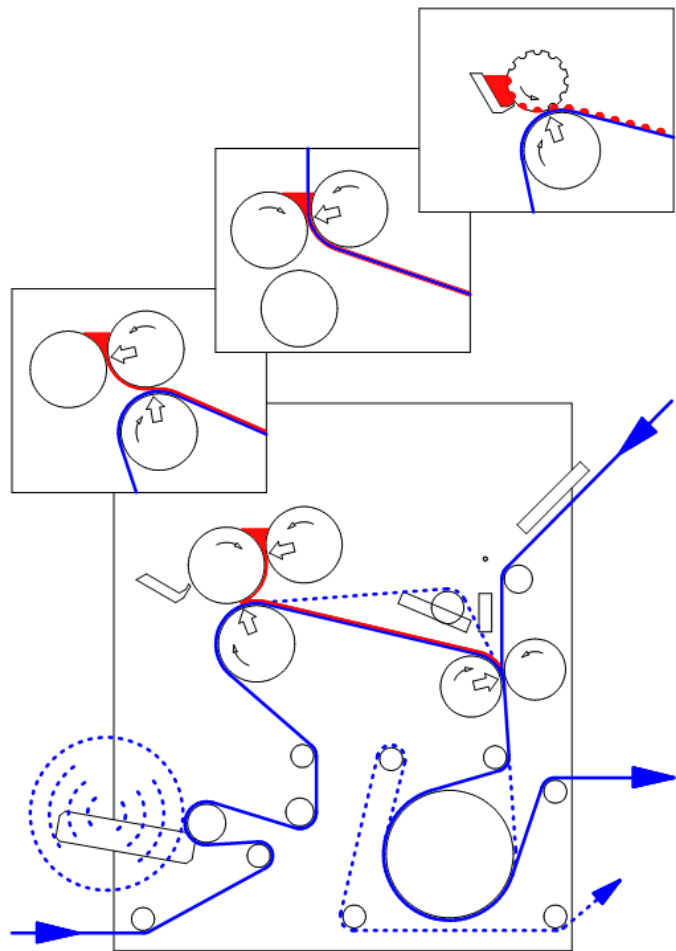

**Multi Roll  
Direct Coating**

**Multi Roll  
Reverse Coating**

**Multi Roll  
Both side Coating**

**Our world has changed . . . . .  
Success depends on flexibility!**
